About Me

Motivated and Detail-Oriented third-year IT undergraduate (GPA 3.6) targeting a 6-month internship in Software Development, MERN Stack, UI/UX, or QA. Highly proficient in Java, JavaScript, React, Node.js, MongoDB, and SQL with proven hands-on experience developing both a full-stack MERN web application and an Android mobile app. Recognized as a fast learner, creative thinker, and strong team player with excellent problem-solving skills committed to contributing meaningfully to professional projects.

Education

Bachelor of Science (Hons) in Information Technology
Sri Lanka Institute of Information Technology (SLIIT) ***2023–Present***

- Current GPA: 3.6
- Key Modules: Object-Oriented Programming (OOP), Database Management Systems (DBMS), Data Structures & Algorithms, Web Application Development, Mobile Application Development, Software Engineering
- Specialized in Information Technology

G.C.E. Advanced Level (Physical Science Stream)
Sangamitta Balika Vidyalaya, Galle ***2021***

Certifications & Professional Training

Certificate in Human Resource Management
IMS Campus, Faculty of Management Studies *March–June 2022*

Artificial Intelligence & Machine Learning Engineer – Stage 1
Sri Lanka Institute of Information Technology *Jan 2026*

Computer Hardware Basics
Cisco Networking Academy *Jan 2026*

Python for Beginners
University of Moratuwa , Department of Computer Science *Dec 2025*

Bring AI to Work Workshop – Gemini Fundamentals
Google *Jan 2026*

Projects

1. RiyaGuru_LK – Driving School Management System (MERN Stack) **August 2025**

A full-stack MERN platform designed to automate driving school operations, including student registration, lesson booking, instructor scheduling, and progress tracking. I developed the payment management module, supporting full and installment plans, generating receipts instantly, and triggering automated email notifications for every transaction. Implemented JWT authentication, 3+ user roles, and secure data handling to ensure structured access control.

- Built using React, Node.js, Express, MongoDB, and Tailwind CSS with a focus on responsive design and scalable architecture.
- **GitHub:** https://github.com/ravindu-sliit/RiyaGuru

3. **WellNest Habit Tracker – Android Mobile App (Kotlin, SharedPreferences)** **October 2025**

An offline Android wellness app supporting habit tracking, mood journaling, and hydration reminders. I implemented habit CRUD for unlimited habits, emoji-based mood logging with 10+ mood options, and scheduled notifications for hydration tracking. The app also integrates advanced mobile features such as a shake-sensor for instant water-log updates, a home-screen widget with real-time progress visibility, and full offline functionality using SharedPreferences with JSON serialization. Developed using Kotlin and Android Studio with a focus on smooth user experience and responsive UI design.

GitHub: https://github.com/SandaniChamoda/Wellnest-Habit-tracker-app

2. Hotel Customer Care System (Java, MySQL, HTML, CSS, Bootstrap) **April 2024**

A web-based customer support system enabling users to submit tickets, track responses, and provide feedback. I developed the Ticket Submission module with 5+ complaint categories, multiple file attachment support, and structured data validation. The system improves communication flow by centralizing requests into a single ticket dashboard, enabling faster and more organized academic test scenarios.

- Developed using Java, MySQL, HTML, CSS, and Bootstrap to maintain clean structure and workflow.
-

4 Vehicle Insurance Management System (PHP, MySQL) **September 2024**

A multi-role insurance platform supporting policy management, claims processing, and user workflows. I contributed by building the Claim Adjuster module, covering the entire claim journey including verification, assessment, and approval steps. Designed 8+ UI wireframes for login, complaint submission, and payment pages, ensuring clear navigation across 4 system roles (Admin, Agent, Adjuster, User).

- Enhanced with PHP, MySQL, HTML, and CSS, following a modular design approach

Experience

Intern — People's Bank, Galle Main Street Branch

Feb 2023 – Aug 2023

- Supported customers with digital banking registrations, mobile app setup, and troubleshooting, contributing to a 15–20% increase in digital service adoption during the period.
- Used internal banking systems for data entry, account processing, and transaction handling with 99% accuracy in records and compliance.
- Assisted front-office operations and customer inquiries, supporting smooth service for 100+ customers daily.
- Supported account services, remittances, and promoted bank products and digital services to increase customer engagement.

Technical Skills

- Backend: Node.js, Express.js, Java, Kotlin, C, C++
- Frontend: React.js, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS
- Databases: MongoDB, MySQL, SQL
- Mobile: Android Studio, Kotlin, SharedPreferences, Widgets, Sensors
- Version Control: Git, GitHub
- API & Testing: Postman
- UI/UX: Figma
- Tools: VS Code, Eclipse, Microsoft Office

Core Skills

- Problem Solving
- Team Collaboration
- Fast Learner
- Self-Learning
- Communication

Languages

- English
- Sinhala

Extracurricular, Leadership and Achievements

- Active Member, Leo Club of SLIIT - participated in community service projects, developing teamwork and leadership skills.
- Member, IEEE Student Chapter - Engaged in technical learning sessions and stayed updated with emerging tech trends.
- Participant, UI/UX Bootcamp - Benchmark 3.0 – Designed and prototyped an AI chatbot, applying user-centered design principles.
- Teacher & Exam Invigilator, Galle Daham Pasal Buddhist Education Council
